STEFAN ANTONIO CIRISANU

Senior Software Engineer | Java, Spring Boot & Distributed Enterprise Architecture

Timișoara, Romania stefan.cirisanu@icloud.com **linkedin.com/in/stefan antonio cirisanu**

EXECUTIVE PROFILE

Senior Software Engineer with over 7 years of experience engineering resilient backends, modular distributed systems, and scalable web platforms. **Oracle Certified Professional in Java SE 21**, specializing in **Spring Boot, Spring Modulith, Domain Driven Design**, and relational data architecture in **PostgreSQL**. Extensive domain background in educational technology, having architected academic workflow systems and thesis analysis tools for university professors in Spain, paired with active academic collaboration at **Universitatea de Vest din Timișoara**. Experienced in leveraging modern AI assisted engineering workflows to accelerate technical delivery while maintaining clean, maintainable, and thoroughly tested codebases.

CORE COMPETENCIES & TECHNICAL ARSENAL

Java & Enterprise Frameworks: Java SE 21 (Oracle Certified Professional), Java SE 17, Spring Boot, Spring Modulith, Spring Data JPA, Hibernate, Spring Security, REST API Design.

Data Architecture & Caching: PostgreSQL, Complex Relational Modeling, Temporal and Versioned Schemas, Append Only Audit Logging, Redis, Liquibase, Flyway, SQL Optimization.

Engineering Practices: Domain Driven Design, Clean Architecture, Modular Systems, Test Driven Development, Code Review Leadership, High Velocity AI Assisted Engineering.

Security & Access Management: Keycloak, Identity and Access Management, Role Based Access Control, OAuth2, OpenID Connect, Data Provenance, OWASP Compliance, European Data Privacy.

Cloud, Tooling & Full Stack: TypeScript, React, Angular Integration, Node.js, Docker, CI CD Automation, AWS Cloud, JUnit 5, Mockito, Testcontainers, Maven, Git.

PROFESSIONAL EXPERIENCE

Lead Software Engineer | Academic Tooling & Educational Integrations (Valencia & Remote) Feb 2023 to Present

- Architected modular backend services in Java and Spring Boot for academic evaluation systems utilized by university educators, orchestrating student coursework evaluation and degree thesis analysis.
- Modeled complex relational PostgreSQL schemas with temporal versioning states (draft, approved, replaced) and frozen cohort configurations, ensuring historical audit records remain strictly immutable.
- Engineered an append only audit journal and information provenance pipeline, guaranteeing every recorded decision, student submission, and evaluation retains its verifiable institutional source.
- Implemented multi role authentication workflows via Keycloak, enforcing role based permissions for educators, evaluators, and administrators under strict European educational data privacy standards.

Lead Software Engineer | Humanity Ledger (Remote) Jan 2023 to Present

- Direct the architectural development of an enterprise grade software platform, utilizing Domain Driven Design and Clean Architecture to isolate critical business logic from external delivery mechanisms.
- Orchestrated asynchronous data synchronization and high traffic caching pipelines in PostgreSQL and Redis, significantly reducing database latency under intensive concurrent usage.
- Pioneered modern AI assisted engineering workflows within the development cycle, accelerating test generation and code delivery across a suite of over 670 automated unit and integration tests.
- Enforced zero trust access policies, timing safe cryptographic comparisons, and comprehensive rate limiting gates across 50 service endpoints to prevent denial of service and enumeration.

PROFESSIONAL EXPERIENCE (CONTINUED)

Systems & Security Software Engineer (Contract) | Aztec Network (Remote) — Feb 2026 to Aug 2026

- Collaborated on the development of secure data validation infrastructure and verifiable state transition protocols, ensuring deterministic processing across distributed network nodes.
- Optimized high throughput data processing pipelines, moving intensive computational workloads to background execution workers while maintaining sub second verification responses.
- Authored technical architecture documentation and conducted peer code reviews to ensure strict adherence to zero fault tolerance standards.

Software Engineer | Scalable Identity Systems | Tools for Humanity (Remote) — Jan 2022 to Dec 2022

- Engineered resilient backend integration layers for a global identity verification system serving millions of users while maintaining 99.99 percent operational uptime.
- Constructed secure APIs in Java and TypeScript to interface reliably with external verification authorities, distributed databases, and event messaging brokers.
- Enforced rigorous session hygiene, automated token rotation policies, and defensive access controls to safeguard identity records against unauthorized access.

Software Engineer | Wolfpack Digital (Cluj Napoca & Remote) — Jan 2020 to Jan 2022

- Led the architectural migration of legacy monolithic backends into modular microservices, reducing service payload sizes by 42 percent and improving system maintainability.
- Designed relational database schemas and tuned complex transactional SQL queries in high volume PostgreSQL environments, guaranteeing strict transaction consistency.
- Communicated directly with enterprise clients and product owners to translate complex business requirements into clear technical roadmaps and reliable sprint deliverables.

ACADEMIC ENGAGEMENTS & EDUCATION

Universitatea de Vest din Timișoara (UVT) | Academic Collaborator — 2026 to Present

Academic collaboration with Professor Cristian Cira at the Faculty of Mathematics and Computer Science, conducting workshops and guest lectures on enterprise software architecture and practical AI engineering.

Bachelor of Science in Cybersecurity | Polytechnic University of Valencia, Spain — Sept 2018 to Jun 2022

Comprehensive academic curriculum covering Software Engineering, Distributed Systems, Relational Database Internals, Application Security, and Secure Software Development Lifecycles.

Oracle Certified Professional: Java SE 21 Developer | Oracle Corporation — Certified 2023

LANGUAGES & CULTURAL BACKGROUND

Romanian: Native (Bilingual fluency) • **English:** Full Professional Proficiency (C1 level, fluent in technical and client communication) • **Spanish:** Native (Bilingual fluency, completed university degree and professional tenure in Spain)
